

Slovak Republic – UNDP Partnership for Results in the International Development
Cooperation

Depository of online courses related to
International Development & Development Assistance

*The depository of online courses related to International Development and Development Assistance has been created within the Slovak Republic – UNDP Partnership project and shall serve as a **tool supporting capacity building of development professionals**. Its usage is wide and it is not limited only to Slovakia as almost all courses listed are available in English and in some cases also in other language versions (French, German or Russian). Special attention has been paid to **FREE e-Learning** opportunities.*

*This depository can be used as a reference for building up of **standard online curricula** for staff of development agencies, respective development departments in the ministries or non-governmental development organizations.*

The topics covered have been selected based on the capacity building needs identified in the study “Project Cycle Management of the Slovak International Development Cooperation – Analysis and Recommendations” prepared for the Slovak Agency for International Development Cooperation (SAIDC) by Jan Cernik and Michal Prochazka (September 2014) and needs assessment conducted in the Ministry of Finance of the Slovak Republic.

*Your **feed-back** is important for us. Please do not hesitate to contact us should you have any comments or proposals for improvements & updates.*

*Slovak Republic – UNDP Partnership for Results in the International Development Cooperation, UNDP Europe and the CIS – Slovak project team, Groesslingova 35, 811 09 Bratislava, Slovakia
